

With the help of this table you can feed your puppy with **MUSH B.A.R.F. Vaisto Puppy -Formula**. Bear in mind that all puppies are individuals and grow at their own pace. Therefore, it is important that you keep an eye on your dog and, if necessary, make changes to its daily feeding amounts to ensure it stays slim and in good shape whilst still growing in height.

***EXAMPLES:** If you have a 5 month old Pomeranian puppy which is expected to reach around 3kg as an adult dog you should feed it 150g per day. For a 9 month old English Bulldog puppy expected to become around 23kg as an adult the daily feeding amount is 1,150 kg per day. Check out our Full Feeding Guidelines for exact amounts.
