Please refer to the Feeding Table below for the optimal daily **MUSH B.A.R.F. Vaisto® STARTER FORMULA** feeding amount for your adult dog based on their size/breed. Give your dog a daily BARF-meal portion equal to 2–5 % of the dogs weight depending on how active they are.

Each dog is unique and the optimal feeding amounts vary significantly depending on factors such as age, activity, metabolism and environment.

As a starting point we suggest you begin at the lower end of our guide (Normal Activity) and adjust accordingly.
